

# ENILITE®

AURORA® LIGHTING GROUP

🇬🇧 TRADE EDITION ONE

**"Times are changing for the lighting industry."**

we have developed an end-to-end smart lighting offering that puts the Aurora Lighting Group at the heart of the smart buildings industry.

Aurora has launched its enterprise smart lighting platform, AXIO, the first in the world to be powered by Gocee and the first to offer a smart lighting product range across multiple applications. Through trade, we have launched the AOne smart lighting "smart spaces" solution that enables homes and small businesses to transform their spaces into smart environments.

However, although the IoT era demands the need for additional technology, both hardware and software, it requires more than just product and a platform. A complete service solution is necessary, from needs assessment, design review to corporate integration, which is how Aurora ensures it is tailored to every individual business' needs and delivers exceptional Value Beyond Illumination™.

Aurora has invested heavily in preparation for this change with the establishment of an IoT division, the expansion of its UK team and the new facilities.

For trade our focus is to lead in connected lighting and sensing control devices that are interoperable on current and future smart platforms. We have continued to innovate, and heavily invest in the development of a new product range and the launch of this new catalogue demonstrates our continued commitment to LED lighting that offers the best in value and performance. We aim to continue to deliver what people expect from Aurora's service.

**Andrew Johnson**  
**Founder & Group CEO**  
**Aurora Lighting Group**

The IoT has brought about benefits through lighting that is revolutionising how it is being specified and considered in the built environment. Lighting is a single essential network that eliminates the need for additional occupancy sensing, control solutions, and energy management whilst providing 'Everything as a Service'. As an existing, essential infrastructure element, lighting can readily form the backbone of an intelligent network of endpoints delivering Value Beyond Illumination across property and business portfolios.

Building intelligence is essential for business efficiency, sustainability and profitability;

The Aurora Group is a multi award-winning international LED lighting & technology organisation, specialising in the design, manufacture and distribution of innovative, smart energy saving solutions for projects, trade and OEM/ODM customers through our global network, supporting trade and projects divisions with the formation of the IoT development and test centre.

UK Design & Manufacturing Platform

Manufacturing, Testing, R&D + Consolidation

Fully Integrated Manufacturing Megacentre

Engineered by the Aurora Lighting Group, Enlite, through its innovative LED design and optics, combined with a proven reputation for quality, is rapidly becoming the number one choice amongst wholesalers, lighting contractors and specifiers on all continents.

Since 2015, Enlite's popular product range has rapidly grown and evolved to become one of the leading trade brands.

This success and growth has been built on the core values of the Aurora Lighting Group and its ability to engineer and deliver reliable, compliant,

high performing solutions within the key product groups of fire rated downlights, LED lamps and LED integrated luminaires.

These values, combined with built-in high product quality, competitive pricing and comprehensive technical support provide a compelling offer.

A highly experienced cross-disciplinary team based at our dedicated Swindon development and test facility. With focus on front and back-end development technologies enhancing customer UI and UX experience the IOT Division is enabling both the Trade and Projects divisions to deliver Value Beyond Illumination.

- Embedded, front and back-end development technologies across Linux and Microsoft technology stacks: Eg. C/C++/C#, ASP.Net, SQL/NoSQL, Node.js
- UI and UX experience covering responsive mobile and desktop designs: HTML5/CSS3/JavaScript/jQuery

- Application development using native iOS and Android or cross-platforms frameworks eg. React Native
- Enhanced wireless lighting control & analytics
- Space utilisation & occupancy analytics
- Sensory architecture

Through our added value focus of design, manufacturing and installation services we are engineered to our customers needs.

Our partnership with Gooee and continuing investment in enabling technology ensures you have a platform partner that is focused on delivering your commercial objectives through lighting solutions.

- Exporting to over 40 Countries
- Value Creating Lighting Design
- Thermal and Optical Specialists
- 22,000 SKU's and custom product options.
- Full service programme management

## New Pro Range Categories

NEW

**AURORA**<sup>®</sup> **AOne**.control  
VALUE BEYOND ILLUMINATION™

Pg.12-13

The new AOne™ kit provides end users with an affordable smart lighting control solution, with increased energy saving and security benefits. Take control from anywhere, including dimming, scene and scheduling functions.

NEW

**E6**PRO

Pg.19

The brand new E6™ PRO is a revolution in LED downlight performance and installation. Utilising a unique RapidWire connection system, the whole product can be fully wired and installed in a matter of seconds.

NEW

**EFD**PRO

Pg.23

The EFD™ PRO is our new range of stylish and professional fire rated GU10 downlights. Perfect for use with Enlite's market leading range of ICE™ lamps, the EFD™ PRO range is also fitted with our latest push-fit terminal block for even faster installation.

NEW

**EDLM**PRO

Pg.40-42

The EDLM™ PRO offers a wide range of downlights which include fixed, adjustable, wallwashers, IP rated and downlight multiples. With contemporary designs and high-quality finishes, the EDLM™ PRO range is ideal for use with Enlite ICE™ lamps.

NEW

**ICE**™  
**LAMP**PRO

Pg.54

The 10W ICE™ Pro is a high specification LED GU10 lamp producing up to 950lm making them ideal for retail and hospitality applications.

NEW

## E6060™ PRO

Pg.62-63

The brand new E6060™, E1230™ and E1260™ PRO range of LED panels deliver an industry leading 110lm/W, producing over 60% energy savings compared to traditional fluorescent. A superior level of construction results in an IP44 rating as standard for damp environments.

NEW

## Ariah™ PRO

Pg.77

Now producing a market leading 150lm/W, Enlite's Ariah™ PRO LED highbay can now replace a traditional 400W industrial fixture with just 150W of LED and provide over 65% energy savings compared to traditional technology.

NEW

## WallE™ PRO

Pg.96-98

Range of decorative interior and exterior luminaires with integrated LED and GU10 options available to suit every commercial and domestic application

NEW

## G-Lite™ PRO

Pg.106-107

The G-Lite™ PRO range of professional in ground GU10 and integrated LED fixtures have superior levels of construction, loop in loop out capability and 316 stainless steel bezel options to enhance both the design and durability of any exterior lighting design

NEW

## LEDline™ PRO

Pg.118-131

LEDline™ PRO offers a variety of high quality of LED strip in single colour or RGB, RGBW and IP rated up to IP67 in either 12V or 24V.

The Smart Lighting Experience

**AOne™**  
powered by **Gooeee®**

# Smart Lighting Spaces

Take Control...

Home

Aurora's AOne™ smart lighting, sensing and control platform, powered by Gooeee®

Retrofit using existing wiring

Control from anywhere

Control via AOne app or remote

Fast & hassle-free installation

Multi-user control

Hub controls multiple inline dimmers

Commercial-grade security

Control individually or as groups  
(requires multiple inline dimmer units)

Designed with lighting in mind

Up to 120W circuit load per dimmer

Scene scheduling

Integration with 3rd party services

## Smartening Spaces from Home to Office to Store

# SMART IN 15 MINUTES

**AOne™ is a retrofit smart lighting, control and sensing platform that can be installed in minutes.**

Aurora's new AOne™ kit spells the end for complicated and expensive lighting control systems.

The dimmers can be installed inline between the switch and first light, or individually in a matter of minutes meaning there's no extra wiring required.

Connect and configure the AOne™ kit on your device, then simply hand over configuration to the user via email.

## 3 STEP SMART HOME INSTALLATION:

1

Connect Hub to internet router via ethernet cable.

AOne™ enables full control of your lighting space via your phone.

2

Plug in power supply.

When powered the 4 LED indicator lights will flash

3

Download FREE AOne App.

Available via the Google Play or IOS App Store. Follow in-app instructions.

## SO WHERE DOES THE AONE™ DIMMER GO?

## TAKE CONTROL

Aurora will bring to market a range of smart lighting, sensing and control devices on the AOne™ platform.

AOne enables full control of your lighting spaces via your handheld devices or remote controllers.

The new AOne kits provide users with an affordable smart lighting control solution, with increased energy saving and security benefits.

Take control from anywhere, including dimming, scene and scheduling functions.

The free AOne App for Android and IOS users allows account sharing amongst multiple users at the touch of a button and control from anywhere in the world!

## Aone<sup>™</sup> Starter Kit

EVERYTHING YOU NEED  
STRAIGHT FROM THE BOX

Choose an intelligent lighting system which includes 6 ultra efficient mPro<sup>™</sup> fire rated downlights - ideal for new build projects.

## AU-A1ZKM6/30

Complete smart lighting kit includes:

### 1x Remote

Wall-mountable ZigBee wireless remote enables local room control, on/off switching, manual dimming and scene setting  
(Battery included)

### 1x Hub

ZigBee smart hub, connects to your home router. Control multiple ZigBee devices

### 1x Inline Dimmer

120W ZigBee wireless LED dimming control module  
220-240V

### 6x Downlights with Bezels

Ultra efficient 600lm 7W IP65 fire rated LED downlights with white bezels  
3000K • 60° Lens • L70 40,000hrs • 65mm Cutout

## Aone™ Retrofit Kit

BEGIN YOUR SMART SPACE LIGHTING EXPERIENCE

The Retrofit Kit enables you to benefit from smart technology without replacing lighting hardware - perfect for use with your existing dimmable fittings.

### AU-A1ZRK1

Retrofit smart lighting kit includes:

#### 1x Remote

Wall-mountable ZigBee wireless remote enables local room control, on/off switching, manual dimming and scene setting  
(Battery included)

#### 1x Hub

ZigBee smart hub, connects to your home router.  
Control multiple ZigBee devices

#### 1x Inline Dimmer

120W ZigBee wireless LED dimming control module  
220-240V

### Smart Lighting Accessories: (purchase individually)

#### AU-A1ZBRC

Wall-mountable ZigBee wireless remote enables local room control, on/off switching, manual dimming and scene setting  
(Battery included)

#### AU-A1ZB120

120W ZigBee wireless LED dimming control module  
220-240V  
(For resistive loads - max 250W capacity)

### Downlights & Bezels

#### AU-MPRO1\*

\*Add suffix /27 (2700K), /30 (3000K) or /40 (4000K)

#### AU-BZ600\*

\*Add suffix W (White), MW (Matt White), PC (Polished Chrome) or SN (Satin Nickel)

\*Full compatibility is not guaranteed with other manufacturers products

## Fire Rated Downlights

### Tool Free : Wire in Seconds

- RapidWire connection system for fastest ever downlight installation
- Plug-in connector to allow for electrical circuit insulation resistance testing
- Ultra efficient 103lm/W
- Insulation coverable

The new Enlite E6<sup>TM</sup> PRO has been designed with the installer in mind. Utilising the revolutionary RapidWire connection system, it has never been faster or more simple to install a downlight. Simply strip the cable and plug it directly into the

removable connector. Close the connector to secure the cables and after testing the circuit, plug straight into the downlight and secure in the ceiling.

No tools. No fuss. No time wasted.

### Market Leading Fire Rated LED Downlights

- Fixed, adjustable and colour switchable LED downlights with a range of lumen outputs, CCTs and bezel accessories
- Fully tested and certified for 30, 60 & 90 minute ceilings, see page 158 for more information
- Loop in/Loop out terminals and insulation coverable for ease of installation

Enlite's range of integrated LED fire rated downlights have set a new standard in performance and value. Ultra efficient LEDs, expert thermal management and widely acclaimed optic designs have all combined to create powerful, reliable and attractive

downlights that have become the market leading favourite. The 440 lumen E5™, the 640 lumen E8™ and the addition of the variable colour temperature E8CX™ means that there is an Enlite fire rated downlight for every application.

**E5™**  
4.5W up to 440 lumens

**E8™**  
8W up to 640 lumens

**E8CX™**  
Colour Switchable

Integrated Insulation Cap

FOR FASTER INSTALLATION

FIRST FIX & TESTING

SECOND FIX

### Description

The brand new E6<sup>TM</sup> PRO is a revolution in LED downlight performance and installation. Utilising the unique RapidWire connection system, the whole product can be fully wired and installed in a matter of seconds. The use of latching terminals provides the security of screw terminations for both solid and stranded core cables and can be wired even faster than standard push fits. The removable connector allows full circuit insulation resistance testing without risking any damage to the downlight, which can be simply plugged in afterwards.

**6W up to 620 Lumens**

### Description

The E8™ colour switchable downlight is an addition to Enlite's well established E8™ range. Featuring the sparkling low glare multifaceted EnFiniti™ lens and delivering up to 620lm. Not sure what colour temperature you want at time of purchase? No problem! The E8™ colour switchable is one light offering 3 whites at the flick of a switch located on the back of the fitting. Simply switch from warm white, cool white & daylight before installation.

**8W 580 - 620 Lumens**  
**L70 25,000 Hours**

### Features & Benefits

- The colour switchable E8™ means you only need to specify or stock one fitting rather than three. Can be switched from 3000K, 4000K and 6500K (prior to installation)
- Allows you to change the colour of your lighting at a later date to suit the interior design
- EnFiniti™ edge-to-edge multifaceted polycarbonate lens for low glare and halogen like appearance
- Fibre based insulation coverable - up to 300mm
- Super slim interchangeable IP65 bezels provide a high end sleek finish (Bezel sold separately)
- Tested in 30, 60 and 90-minute fire rated ceilings
- 3 year warranty

## Downlights

### Description

The range of triac dimmable Lumi-Fit™ commercial downlights deliver up to an impressive 106lm/W. Supplied with remote driver and fitted with an acrylic diffuser to reduce glare and for even light distribution. With multiple wattages and sizes on offer this range meets the needs for countless new commercial applications or an upgrade for compact fluorescent fittings in existing applications.

**Up to 106 lm/W**

**13 - 45W**

**up to 4500 Lumens**

**L70 40,000 Hours**

**DALI compatible**

### Features & Benefits

- Low cost energy saving alternative to compact fluorescent fittings
- Life not affected by frequent switching e.g. when used with occupancy controls
- Triac dimmable as standard
- Plug and play remote driver for easy installation
- DALI version available to order
- IP54 rated
- 1.5kV surge protection
- 3 year warranty

Plug & Play driver included for easy installation

### Description

Performance and Value - that's what the Uni-Fit™ range of commercial downlights stands for. Featuring ThermoTec™ technology, integrated driver and high quality LED chips to deliver an outstanding lumen performance. The triac dimmable Uni-Fit™ range is the ideal cost effective solution for new or existing installations where traditional compact fluorescent downlights need upgrading to more efficient LED technology.

### ThermoTec™

**10 - 30W**

**up to 2800 Lumens**

**L70 25,000 Hours**

#### EN-DDL10

10W Integrated IP44  
Dimmable LED Downlight

### Features & Benefits

- Multiple sizes and wattages available to suit all new and retrofit installation lighting requirements
- ThermoTec™ technology utilises a combination of highly efficient LED light source, aluminium heat sinking and thermoplastic material for longer life and consistent performance
- Compact integrated driver for easy installation and shallow ceiling voids
- Life not affected by frequent switching e.g. when used with occupancy controls
- IP44 rated
- Pre-wired with 500mm 2 core cable
- 1.5kV surge protection
- 3 year warranty

LED Downlight

### Description

Introducing the stylish CurveE™ LED downlight range, this low glare downlight has a sleek baffled design with the light source recessed back to reduce glare. Available in matt white these triac dimmable downlights are an ideal non-fire rated solution for hospitality and residential applications in areas where fire rating is not required.

**7 - 10W**

**up to 970 Lumens**

**L70 25,000 Hours**

### Features & Benefits

- Baffled design for low glare - LED recessed by 10mm or 20mm
- Plug and play remote driver for easy installation
- IP44 rated - ideal for hospitality and residential applications such as corridors, living areas, bedrooms, dining rooms and zone 2 of bathrooms
- UGR19 (Unified Glare Rating)
- 2.0kV surge protection
- 3 year warranty

4000K

AMBIENT TASK LIGHTING  
5700K

### Description

Perfect for new build, retrofit and commercial installations, the PolaCX™ colour switching and triac dimmable downlight is an ideal luminaire for creating the perfect scene. The colour temperature can be adjusted between 2700K, 4000K and 5700K to select the desired task and mood lighting requirements.

**10W 820 Lumens**  
**L70 40,000 Hours**

### Features & Benefits

- Colour changing LED downlight for maximum flexibility
- Ideal for office, educational and communal lighting applications where light colour and output can be adjusted to suit task and mood
- IP54 rating - suitable for bathroom installation (Zones 2 & 3)
- Works with existing rotary dimming switch
- 1.5kV surge protection
- 3 year warranty

### Biodynamic light & circadian rhythm

150 years ago most of our time was spent outside under the blue sky. Today most of us spend 90 percent of our time indoors. Throughout the day, daylight changes constantly in quantity, directional characteristics, colour temperature and colour rendering. Daylight has the ability to invigorate and promote a sense of

well-being within people. The therapeutic quality of natural lighting has never been in doubt however we have not really understood how or why, until recently. Probably the most important finding is that light controls our biological or body clock through regular light-dark rhythms, known as the circadian rhythm.

STANDARD LED LAMP WITH VISIBLE BEZEL

## Description

Due to popular demand, the market leading ICE™ lamp range has grown. Achieve significant energy savings and light output with ICE™ lamp 4W alongside the already established industry leading 5W 108lm/W GU10 lamps. Featuring ThermoTec™ heat management technology and EnFiniti™ lenses which are also available in 38° beam angle. The ICE™ range has proved to be exceptionally reliable delivering up to 540 lumens in both dimmable and non-dimmable, allowing for direct halogen lamp replacement at a fraction of the energy consumption.

## Industry Leading Efficacy up to 108lm/W L70 25,000 Hours

### Technical Information

### Features & Benefits

- Excellent efficacy - Up to 95lm/W delivers more light using less energy
- ThermoTec™ technology utilises a combination of highly efficient LED light source, aluminium heat sinking and thermoplastic material for longer life and consistent performance
- EnFiniti™ edge-to-edge multifaceted polycarbonate lens creates low glare and halogen like appearance
- Featuring advanced electronics to deliver a high 0.8 power factor
- 24° and 38° beam angles - perfect for high ceilings, retail and hospitality
- 1.5 kV surge protection
- 3 year warranty

### COMBINED ThermoTec™ & EnFiniti™ TECHNOLOGY

## Description

Save money and energy in residential and commercial installation by replacing traditional halogen MR16 and MR11 with Enlite ICE™ LED retrofit lamps. MR11 available in both 12V and mains 240V, providing an ideal retrofit solution with their low power consumption and high light output, replacing 20W halogen and delivering up to 90% in energy savings.

## MR16 Features & Benefits

- Excellent efficacy - Range up to 104lm/W
- Featuring EnFiniti™ and ThermoTec™ technologies
- Available in 60° & 38° beam angles
- **3 year warranty**

## MR11 Features & Benefits

- High efficacy over traditional halogen technology - up to 80lm/W
- EN-MR11GU4 direct mains replacement - no need for low voltage transformer
- EN-MR1116 coated with dichroic reflective material making it an ideal halogen replacement
- EN-MR116 has a filament LED chip for improved output and look when lit
- Ideal for installation in directional spotlight and cabinet applications
- 0.5kV surge protection - EN-MR11GU4
- **3 year warranty**

### Description

The simply classic glass E360™ GLS lamp looks so much like traditional filament bulbs that you wouldn't be able to tell they're LED. Utilising the latest LED technology and GlassTec™ design, light is distributed in a full 360° angle. This ensures even illumination and warm light spread as found with traditional filament technology, but at a fraction of the energy consumption.

### Features & Benefits

- Efficacy of 88lm/W delivers more light using less energy
- Featuring GlassTec™, light is distributed 360° to eliminate dark shadows and provide full illumination
- 2700K colour temperature ensures a warm light effect in keeping with traditional filament bulbs
- Available in B22 and E27 lamp base types
- **3 year warranty**

### Technical Information

### Description

Whether for chandeliers, table lamps or wall fittings, the EDim™ range of dimmable GLS, Candle and Golf Ball shaped lamps are perfect for illuminating rooms and areas where ambient lighting may be needed. Compatible with most leading and trailing edge dimmers, these LED lamps enable large energy savings compared to traditional technology while still letting you set the desired light output.

### Features & Benefits

- Efficacy up to 90lm/W delivers more light using less energy
- Dimmable with most leading and trailing edge dimmers
- 2700K colour temperature for warm white ambient lighting
- Available in variety of common lamp base types
- 3 year warranty

### Description

The Enlite range of LED tubes is a cost effective solution for either retrofitting existing T8 fittings or in new installations. Utilising the latest LED technology, they use 50% less energy when compared to traditional fluorescent T8 tubes.

180° beam angle with 360°

Impact resistant polycarbonate housing for maximum protection

### Features & Benefits

- Impact resistant Polycarbonate
- Up to 89lm/W - high efficacy over traditional T8 fluorescent technology
- LED starter included, preventing risk of electric shock when tubes are inserted or removed from luminaire
- Suitable for use at -20° to +40°C making the range ideal for multiple applications and environments
- Life not affected by frequent switching e.g. when used with occupancy controls
- 1.5kV surge protection
- All electronic ballasts and PFC capacitors must be removed from the circuit
- **3 year warranty**

## LED Panels & Linears

### Description

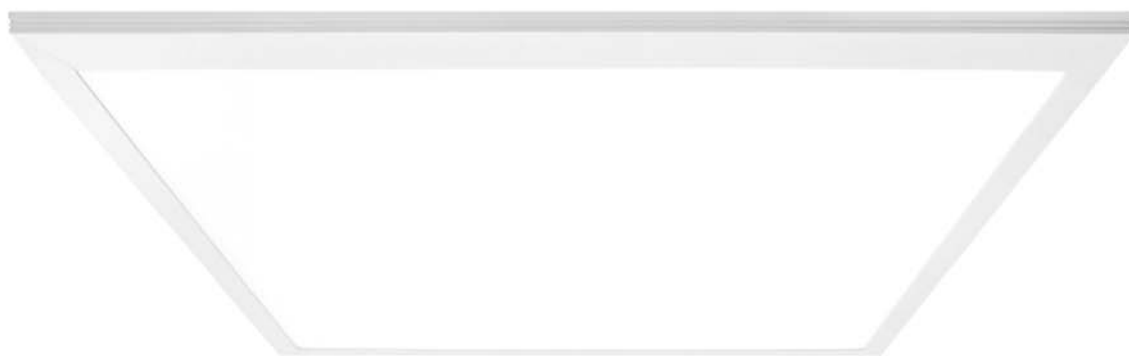

The brand new E6060<sup>TM</sup>, E1230<sup>TM</sup> and E1260<sup>TM</sup> PRO range delivers an industry leading 110lm/W, producing over 60% energy savings compared to traditional fluorescent. A superior level of construction results in an IP44 rating as standard for damp environments.

**DALI compatible**

### Features & Benefits

- Edge-lit design and optical pattern light guide engineered for even light distribution
- Suitable for installation in 15 & 24mm T-bar ceilings
- SDCM <4 providing consistent light colour quality
- IP44 rated from the front
- UGR 19 (Unified Glare Rating) - suitable for use in offices
- Flicker free driver - Power Factor >0.9
- 1-10V dimmable, DALI and emergency versions available
- Surface mount box, ceiling recess box and adjustable suspension kit available
- 1.5kV surge protection
- **5 year warranty**

### Description

The E6060™ has been upgraded to produce 95lm/W for outstanding energy savings. The light guide board and diffuser have been engineered to ensure maximum light output and complete uniformity. Suitable for a wide range of applications including office, education and commercial spaces.

**DALI compatible**

### Features & Benefits

- Edge-lit design and optical pattern light guide engineered for even light distribution
- Suitable for installation in 15 & 24mm T-bar ceilings
- SDCM <5 providing consistent light colour quality
- UGR 19 (Unified Glare Rating) - suitable for use in offices
- Flicker free driver - Power Factor >0.9
- Life not affected by frequent switching e.g. when used with occupancy controls
- 1-10V dimmable, DALI and emergency versions available
- Surface mount box and adjustable suspension kit available
- 1.5kV surge protection
- **3 year warranty**

2 ROWS OF LEDS FOR MAXIMUM ILLUMINATION

### Description

Solid and functional, the EnPac™ range of LED battens are an ideal solution for indoor commercial and industrial applications. Designed specifically for LED, their tough IK08 exterior and high transmittance low glare diffuser provides great performance and light distribution for all internal applications. Suitable for ceiling and wall mounting.

### Features & Benefits

- Sleek aesthetic design - steel housing with polycarbonate diffuser
- Instant start, high output, energy efficient LED light bars are an ideal retrofit solution for T8 fluorescent tubes
- High quality diffuser covering the LED light bars eliminates unwanted glare providing visual comfort
- Surface mounted fitting suitable for most indoor and industrial applications such as warehousing, retail, internal industrial, storage rooms, back office spaces and corridors
- Large terminal block for easy installation. Side conduit, rear entry and through cable wiring
- IK08 impact rating
- 1.5kV surge protection
- **3 year warranty**

(H) Height (see table)

### Description

The Eco8™ range of slimline LED battens are designed around simplicity. With their integrated driver and easy access rear terminal block, they're available in a range of lengths and lumen outputs. They are a discreet upgrade or replacement to traditional single T8 fluorescent fittings.

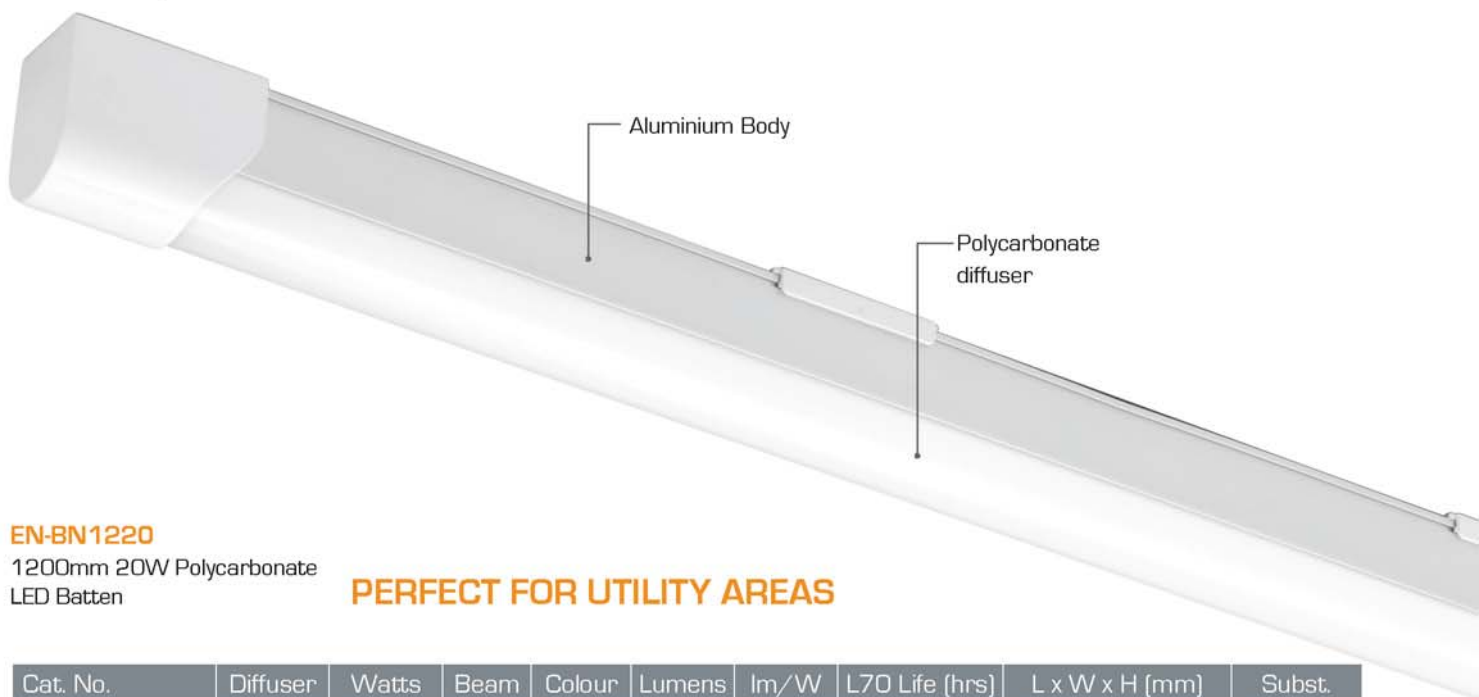

**10 - 24W**

**up to 2160 Lumens**

**L70 35,000 Hours**

### Features & Benefits

- Super lightweight aluminium body and polycarbonate opal diffuser - no hot spots
- Sleek and simple modern design engineered specifically around LED technology
- Adjustable surface mount clips to suit installation requirements and retrofit
- Easy access and wire terminal block on rear
- Ideal for commercial, back office, kitchen, hallways, wardrobes and domestic garages
- **3 year warranty**

### Technical Information

### Description

The range of EcoT8™ integrated open LED battens looks so close to traditional T8 and T5 open style fluorescent fittings, you won't be able to tell they are LED. Perfect for retrofit or new build, they've been designed specifically to mimic traditional fittings. Maintenance free and available in single or twin with or without reflector, now you can upgrade and benefit from all the advantages of LED technology while maintaining existing look and feel of traditional fluorescent.

Market leading  
efficiency of  
150lm/W

IMPROVED PERFORMANCE  
COMPACT SIZE

HIGH POWER LED ARRAY

### Description

Now producing a market leading 150lm/W, Enlite's Ariah<sup>TM</sup> PRO LED highbay can now replace a traditional 400W industrial fixture with just 150W of LED. Providing over 65% energy savings compared to traditional technology, Ariah<sup>TM</sup> PRO gives impressive ROI figures, with all the advantages of a zero maintenance industrial LED fixture.

### Features

- IP65 rated die-cast aluminium housing for maximum protection in all environments - IK08 impact rating
- 1-10V dimmable as standard
- Highly thermal efficient aluminium heatsink - low operating temperature to extend product life
- Ideal for use in warehousing, manufacturing, industrial lighting, canopies etc
- High power factor of 0.92
- 120° beam angle as standard, optional 60°, 70° or 90° aluminium and polycarbonate reflectors available (sold separately)
- Suspension and wall mounting options
- Supplied with 1.2m mains cable
- Net weight of EN-HB100C - 3.4kg EN-HB150C - 3.9kg EN-HB200C - 5.51kg
- Ambient temperature -30°C to +50°C
- 1.5kV surge protection
- 5 year warranty

LED High Bays & Floodlights

## Description

New to the QuaZar™ floodlight range is the QuaZarPIR™. Maintaining the popular slim design, the inclusion of a PIR incorporates the function of motion detection, without compromising the product's popular appearance. The PIR has been specially designed to help reduce false triggering; both the position and functions can be fully adjusted to suit any application. Ideal for both domestic and commercial applications, the QuaZarPIR™ is perfect for security lighting as well as helping to reduce energy costs.

## 10 - 50W

up to **5000 Lumens**

**L70 25,000 Hours**

## Features & Benefits

- IP65 rated LED floodlight with ultra slim design and adjustable PIR sensor
- PIR detection distance up to 10m and detection range of 120°
- PIR mode selector dials to adjust daylight, time and sensitivity
- Available in black and white finish housing
- Pre-wired with 800mm of cable
- 1.5kV surge protection
- **3 year warranty†**

## LED Bulkheads

### Description

The IP66 Orbital™ bulkhead range is simple yet perfect for bulkhead applications. Engineered with a tough polycarbonate body and opal diffuser for even light output with no LED hot spots, all versions and accessories are impact resistant and designed to last. Available in two wattages, white and black housing, interchangeable eyelid bezels, emergency and microwave options. This range ticks all the boxes for any installation. Life not affected by frequent switching e.g. when used with occupancy controls.

**15 - 27W up to 1800 Lumens**  
**L70 25,000 Hours**

#### EN-BH25

25W Polycarbonate IP66  
 Round LED Bulkhead

### Features & Benefits

- IP66 LED bulkhead not affected by frequent switching
- IK10 polycarbonate body and diffuser for maximum vandal resistance
- Rear entry access wiring compartment allows for easy installation
- Interchangeable eyelid bezel accessory available
- Separate 20mm conduit side entry
- Wall or ceiling mounted - accessories included
- Emergency and microwave options available
- Adjustable light detector from 2-50 lux
- Adjustable hold time 5 seconds to 30 minutes
- 1.5kV surge protection
- 3 year warranty

(SP) 173mm Spike Length

### Description

The Enlite S-Lite™ spike light is perfect for garden and outdoor areas. The head can be angled up to 270° and the cowl is removable if required to suit your application needs. Supplied with a spike, which can be removed if fitting on a mounting base (sold separately).

### ENHANCE YOUR GARDEN WITH COLOURED ICE LAMPS

### Features & Benefits

- IP65 Mains voltage adjustable black spike light
- Die-cast aluminium housing
- 180° adjustable head allows you to direct light as required
- Mounting base for floor/wall mounting (sold separately) - EN-SLM
- For use with GU10 lamps – lamps not included (Max 20W lamp)
- Pre-wired with 1 metre of rubber cable
- 3 year warranty

## LED Strip & Channel

As our most versatile lighting solution, our LED strip and flex works perfectly in an array of applications and it comes as no surprise that these solutions are more in-demand than ever. As a result, we're making it even easier for you to incorporate LED strip into a lighting design scheme. Now you can receive custom lengths of our popular LED strip and flex, pre-cut to your specification.

We aim to despatch 48 hours from receipt of your order.

Please contact your local sales representative or our friendly sales team via telephone 01727 83 66 11 or email: [ledstrip@enlitemighting.com](mailto:ledstrip@enlitemighting.com) or visit [enlitemighting.com](http://enlitemighting.com)

## Description

Aluminium channel offers a choice of recessed, surface and corner mount options. With limitless application, the channel is ideal for use with the Enlite LED strip for living rooms, cove lighting or under counter tops.

## Features & Benefits

- Aluminium profiles for mounting flexible or solid LED strips up to 10.8 mm wide
- 1m and 2m standard lengths
- Available with clear or frosted diffuser covers (sold separately)
- With or without cable entry end caps (sold separately)
- Aluminium finish; anodised aluminium finish for EN-CH102 and EN-CH103
- LEDline and LEDline Pro strip has adhesive backing to fix it in the profile

### Description

LEDline<sup>TM</sup> PRO single colour 24V super bright LED strip is ideal for when LED strip with a higher lumen output is required. Increased brightness by using twice as many LEDs per metre than standard LED strip. Low power consumption of 9.6W per metre. Strip can be cut to length and 2m leads soldered to special order.

**9.6W**

**up to 1084 Lumens/metre**

**L70 35,000 Hours**

### Features & Benefits

- High density single colour flexible LED strip with 3M<sup>TM</sup> self adhesive backing
- Beam angle of 120° and 9mm between LEDs, 120 LEDs per metre
- Cut points every 50mm for maximum flexibility
- Voltage drop of 4.5V per 10m and maximum run of 10m
- For runs over 10m individual lengths should be connected in parallel
- Requires 24V LED driver (sold separately)
- Reel length of 10m
- **3 year warranty**

### Description

LEDline<sup>TM</sup> PRO RGBW colour changing 24V super bright LED strip is ideal for when LED strip with a higher lumen output is required. The option of RGBW helps the user choose between colour changing or offering a pure white finish all in one strip. Increased brightness by using twice as many LEDs per metre than standard LED strip. RGBW 4 in 1 LEDs allows for programmable settings including static colours, colour changing and pure white modes. Maximum power consumption of 19.2W per metre. Strip can be cut to length and 2m leads soldered to special order.

**19.2W 1440 Lumens/metre**  
**L70 35,000 Hours**

### Features & Benefits

- High density RGBW colour changing flexible LED strip with 3M<sup>TM</sup> self adhesive backing
- 3000K or 4000K true white options
- Beam angle of 120° and 17mm between LEDs, 60 LEDs per metre
- Cut points every 100mm for maximum flexibility
- Voltage drop of 5V per 5m and maximum run of 5m
- For runs over 5m individual lengths should be connected in parallel
- Requires 24V LED driver (sold separately)
- Reel length of 5m
- 3 year warranty

### Technical Information

#### RGB Colour Changing

For 24V drivers see pg.143

## AU-DMXRGBC

DMX RGB/RGBW Controller  
Control Option 1

### RGB Controller Features

- Glass touch colour control wheel for simple colour selection
- Brightness control for smooth dimming
- Colour change mode with variable speed setting
- Memory settings to save user defined colour
- Requires a 12V or 24V DC supply (not included)
- Use to control AU-DMX060, AU-DMX090 or AU-DMX1500

## AU-DMXCS03

DMX Master Controller  
Control Option 2

See pg.146 for DMX control switch

### RGB Controller Features

- DMX control switch allows control of colour changing RGB strip
- Three switches to select colour, dim / fade and 12 programmes including light to sound activation using the built-in microphone
- Single static colour can be manually mixed and dimmed
- Colour changing time delay (5 seconds - 60 minutes) and fade speed (smooth fade or switching between colours) can be altered to suit the application
- Use to control up to 30 x AU-DMX060 or AU-DMX090 RGB controllers
- Includes DMX power supply
- Fits a 35mm deep (minimum) 2 gang surface or recessed mounting box

## AU-RGB1224A

12V - 24V RGB Controller  
Control Option 3

See pg.146 for RGB Controller

### RGB Controller Features

- Suitable for control of 12V or 24V DC RGB LED strip
- Output Wattage: 12V: <216W, 24V: <432W
- 18 Preset colour changing functions
- Precise touch colour selection wheel
- Adjustable brightness and colour change speed
- Remote control with 1m range (3 x AAA batteries required)

### Technical Information

## AU-DMX060/AU-DMX090

60W / 90W DMX RGB Controller

See pg.146 for 60W/90W DMX controller and wiring diagram

### DMX Controller Features

- DMX colour change interface suitable for the control of RGB LED strip
- Maximum load: AU-DMX060 60W, AU-DMX090 90W
- Up to 30 units may be controlled by 1 x AU-DMXCS03 or AU-DMXRGBC control switch to allow the synchronised control of multiple RGB loads
- Can control 12V & 24V DC RGB products
- Additional 12V or 24V DC constant voltage LED driver required

### Description

LEDline<sup>TM</sup> PRO single colour 24V IP67 super bright LED strip is ideal for when LED strip with a higher lumen output is required in wet environments and external applications. Increased brightness by using twice as many LEDs per metre than standard LED strip. Low power consumption of 9.6W per metre. Strip can be cut to length and 2m leads soldered to special order.

**9.6W up to 1036 Lumens/metre**  
**L70 35,000 Hours**

### Features & Benefits

- High density IP67 single colour flexible LED strip with 3M<sup>TM</sup> self adhesive backing
- Beam angle of 120° and 9mm between LEDs, 120 LEDs per metre
- Cut points every 50mm for maximum flexibility
- Voltage drop of 4.5V per 5m and maximum run of 10m
- For runs over 10m individual lengths should be connected in parallel
- Any joints or termination points are maximum IP65 rated
- Requires 24V LED driver (sold separately)
- Reel length of 10m
- **3 year warranty**

#### Technical Information

#### EN-STIPCK

#### Kit Includes

- 2 power leads
  - 2 end caps
  - 4 heat shrink sleeves
  - 1 tube of sealant
  - 6 fixing clips
  - 12 fixing screws
- Requires soldering

For 24V drivers see pg.144

## Description

LEDline<sup>TM</sup> PRO RGBW colour changing 24V IP67 super bright LED strip is ideal for when LED strip with a higher lumen output is required in wet environments and external applications. The option of RGBW helps the user choose between colour changing or offering a pure white finish all in one strip. Increased brightness by using twice as many LEDs per metre than standard LED strip. RGBW 4 in 1 LEDs allows for programmable settings including static colours, colour changing and pure white modes. Maximum power consumption of 19.2W per metre. Strip can be cut to length and 2m leads soldered to special order.

## Features & Benefits

- High density IP67 RGBW colour changing flexible LED strip with self adhesive backing
- Beam angle of 120° and 17mm between LEDs, 60 LEDs per metre
- Cut points every 100mm for maximum flexibility
- Voltage drop of 5V per 5m and maximum run of 5m
- For runs over 5m individual lengths should be connected in parallel
- Requires 24V LED driver (sold separately)
- Reel length of 5m
- 3 year warranty

**19.2W 1440 Lumens/metre**  
**L70 35,000 Hours**

## Technical Information

### Description

LEDline<sup>TM</sup> PRO RGB colour 24V IP67 super bright LED strip is ideal for when LED strip with a higher lumen output is required in wet environments and external applications. Increased brightness by using twice as many LEDs per metre than standard LED strip. RGB LEDs allow for programmable settings including static colours and colour changing modes. Low power consumption of 14.4W per metre. Strip can be cut to length and 2m leads soldered to special order.

**14.4W RGB**  
**L70 35,000 Hours**

### Features & Benefits

- High density IP67 colour changing flexible LED strip with 3M<sup>TM</sup> self adhesive backing
- Beam angle of 120° and 17mm between LEDs, 60 LEDs per metre
- Cut points every 100mm for maximum flexibility
- Maximum run of 5m
- For runs over 5m individual lengths should be connected in parallel
- Any joints or termination points are maximum IP65 rated
- Requires 24V LED driver (sold separately)
- Reel length of 10m
- **3 year warranty**

## AU-DMXRGBC

DMX RGB/RGBW Controller  
Control Option 1

### RGB Controller Features

- Glass touch colour control wheel for simple colour selection
- Brightness control for smooth dimming
- Colour change mode with variable speed setting
- Memory settings to save user defined colour
- Requires a 12V or 24V DC supply (not included)
- Use to control AU-DMX060, AU-DMX090 or AU-DMX1500

## AU-DMXCS03

DMX Master Controller  
Control Option 2

See pg.146 for DMX control switch

### RGB Controller Features

- DMX control switch allows control of colour changing RGB strip
- Three switches to select colour, dim / fade and 12 programmes including light to sound activation using the built-in microphone
- Single static colour can be manually mixed and dimmed
- Colour changing time delay (5 seconds - 60 minutes) and fade speed (smooth fade or switching between colours) can be altered to suit the application
- Use to control up to 30 x AU-DMX060 or AU-DMX090 RGB controllers
- Includes DMX power supply
- Fits a 35mm deep (minimum) 2 gang surface or recessed mounting box

## AU-RGB1224A

12V - 24V RGB Controller  
Control Option 3

See pg.146 for RGB Controller

### RGB Controller Features

- Suitable for control of 12V or 24V DC RGB LED strip
- Output Wattage: 12V: <216W, 24V: <432W
- 18 Preset colour changing functions
- Precise touch colour selection wheel
- Adjustable brightness and colour change speed
- Remote control with 1m range (3 x AAA batteries required)

### Technical Information

## AU-DMX060/AU-DMX090

60W / 90W DMX RGB Controller

See pg.146 for 60W/90W DMX controller and wiring diagram

### DMX Controller Features

- DMX colour change interface suitable for the control of RGB LED strip
- Maximum load: AU-DMX060 60W, AU-DMX090 90W
- Up to 30 units may be controlled by 1 x AU-DMXCS03 or AU-DMXRGBC control switch to allow the synchronised control of multiple RGB loads
- Can control 12V & 24V DC RGB products
- Additional 12V or 24V DC constant voltage LED driver required

### Description

LEDline<sup>TM</sup> PRO single colour LED strip is ideal for both commercial and residential indoor applications such as displays and pelmets. Low power consumption of 4.8W per metre. Strip can be cut to length and 2m leads soldered to special order.

**4.8W**

**up to 540 Lumens/metre**

**L70 35,000 Hours**

### Features & Benefits

- Single colour flexible LED strip with 3M<sup>TM</sup> self adhesive backing
- Beam angle of 120° and 17mm between LEDs, 60 LEDs per metre
- Cut points every 100mm for maximum flexibility
- Voltage drop of 4V per 10m and maximum run of 10m
- For runs over 10m individual lengths should be connected in parallel
- Requires 12V LED driver (sold separately)
- Reel length 10m
- **3 year warranty**

# FlexE240™

Interconnectable,  
encased in a silicon  
weatherproof IP65  
rated jacket

IP65 FULLY FLEXIBLE SILICON LED STRIP

INTERIOR & EXTERIOR  
ACCENT LIGHTING

### Description

The FlexE240™ mains 240V LED strip kits are ideal for all interior and exterior accent lighting applications. Each strip is encased in a flexible IP65 silicon jacket for maximum weather protection. The interconnectable ends allow for lengths up to 30 metres to be joined together - perfect to create stunning interior, garden, landscape, and architectural lighting. Available in two kit lengths and a range of colour temperatures including RGB, for optimum scene creation.

**24 - 60W**

**700 Lumens/metre**

**L70 25,000 Hours**

### Features & Benefits

- IP65 rated LED strip - perfect for interior & exterior applications (not cuttable)
- IP65 rated plug and play connections allow for easy customisation
- Mains voltage power allows for long length runs to be interconnected (max single run 30 metres)
- Power lead supplied separately for installation flexibility
- Infrared remote and controller supplied as part of RGB power lead kit
- Mounting clips supplied with strip pack
- 1kV surge protection
- 3 year warranty

### Technical Information

### Description

LEDline™ cuttable 12V single colour LED strip kit is an ideal solution for discreet accent lighting of applications such as undercabinet, pelmet, display, cupboard, sign and other recessed areas that need highlighting.

### Features & Benefits

- Cuttable single colour flexible 5m LED strip kit
- Ideal for indoor use in various applications including accent, undercabinet, pelmet, signs and display lighting
- Available in 3000K, 4000K and Blue colour temperatures
- 3M™ self adhesive backing on rear for easy fixing and installation
- Cut points every 50mm
- Plug and power lead included in kit
- 3 year warranty

**24W**

**up to 240 Lumens/metre**

**L70 25,000 Hours**

### Technical Information

### Description

LEDline™ cuttable 12V colour changing LED strip kit is an ideal solution for discreet accent lighting of applications such as undercabinet, pelmet, displays, cupboards, signs and other recessed areas that need highlighting.

**36W RGB**

**L70 25,000 Hours**

### Features & Benefits

- Cuttable RGB colour changing flexible 5m LED strip kit
- White colour setting not a true substitute for true white
- Suitable for a variety of indoor applications where different colour schemes are needed within a space
- 3M™ self adhesive backing on rear for easy fixing and installation
- Cut points every 100mm
- Plug and power lead included in kit
- 3 year warranty

### EN-STK5RGB

5m 12V RGB Cuttable LED Strip Kit

### Kit includes:

5m RGB LED strip

LED driver

Lead for Plug & Play

RGB controller

Infrared remote

### Technical Information

### Description

The slim profile, undercabinet light bar Blade™ can be adapted to suit the application. With multiple configurations, lengths can be connected using the link leads or the connectors making it ideal for use in kitchens, display cabinets and wardrobes. LED light points are eliminated by the frosted diffuser creating an even light distribution. Easy to install using the plug in power lead and a 12V LED driver.

### 5.5 - 10.5W Slim Profile & Interconnectable

On/OFF Switch

#### EN-CL55T

5.5W 500mm Undercabinet Light

### Features & Benefits

- Benefit from longer life and higher energy savings compared to traditional T4 & T5 fluorescent fittings
- Suitable for mounting under, in or above kitchen cabinets, shelves, display cabinets, bookcases etc
- Power and interconnection leads supplied separately for added customisation
- Fittings can be used on their own, connected end to end, connected with the corner bar or using interconnection leads (maximum run of 2 metres)
- Plug and play PIR sensor available as an accessory
- PIR detection distance up to 1m, detection range 60°. Time lag can be adjusted to 1 minute or 5 minutes, distance and sensitivity can also be adjusted.
- On/off touch switch allows independent control of interconnected fittings
- Supplied with mounting clips
- Requires 12V LED driver (sold separately)
- **3 year warranty**

### Description

LinkE™ undercabinet LED striplights are a great solution for new or T4 and T5 retrofit installation. With their simple plug and play linking feature, different lengths can be created to suit depending on kitchen cabinet or wardrobe lengths. Available in both 3000K and 4000K with separate interconnection leads to allow for connections between partitions, they provide a simple solution to suit lighting requirements.

### Features & Benefits

- Benefit from longer life and higher energy savings compared to traditional T4 & T5 fluorescent fittings
- Suitable for mounting under, in or above kitchen cabinets, shelves, display cabinets, bookcases etc
- Fittings can be used on their own, connected end to end or using interconnection leads
- On/off switch allows independent control of interconnected fittings
- Power and interconnection leads supplied separately for added customisation
- Supplied with mounting accessories
- **3 year warranty**

## Technical Information

## Description

DMX RGB Sub Controller. DMX colour change interface suitable for the control of RGB LED strip etc. Maximum load: AU-DMX060 60W, AU-DMX090 90W, AU-DMX1500 150W. Up to 30 units may be controlled by 1 x AU-DMXCS03 control switch to allow the synchronised control of multiple RGB loads. Can control 12V & 24V DC RGB products. Additional 12V or 24V DC constant voltage LED driver required (according to voltage of connected load). Use AU-DMX1500 for RGBW control. Must be installed indoors.

**1 year warranty**

### AU-DMX060

60W DMX RGB Sub Controller

### AU-DMX090

90W DMX RGB Sub Controller

### AU-DMX1500

150W DMX RGBW Sub Controller

## Technical Information

## Description

DMX wall controller providing on-off control and full dimming. Pre-programmed effect and selection can be stored for up to 4 presets. Suitable for RGB and RGBW LED strip. Requires a 12V or 24V DC power supply (not included). Use to control AU-DMX060, AU-DMX090 or AU-DMX1500.

**1 year warranty**

### AU-DMXRGBC

DMX RGB/RGBW Controller

## Technical Information

## Description

DMX Master Controller. Three switches to select colour, dim / fade and 12 programmes including light to sound activation using the built-in microphone. Single static colour can be manually mixed and dimmed (almost any colour can be achieved). Colour changing time delay (5 seconds - 60 minutes) and fade speed (smooth fade or switching between colours) can be altered to suit the application. Use to control up to 30 x AU-DMX060 or AU-DMX090 RGB controllers. Includes DMX power supply. DMX control switch allows control of colour changing RGB strip or lamps in bars, restaurants and domestic applications. Fits a 35mm deep (minimum) 2 gang surface or recessed mounting box.

**1 year warranty**

### AU-DMXCS03

DMX Master Controller

POWER SUPPLY INCLUDED WITH AU-DMXCS03

## Technical Information

## Description

Colour changing 12V - 24V RGB Controller with Output Wattage: 12V: <216W, 24V: <432W. 18 Preset colour changing function with adjustable brightness and colour change speed includes remote control with 1m range (3 x AAA batteries required). 1 controller per application.

**1 year warranty**

### AU-RGB1224A

RGB Controller

## Technical Information

## DMX RGB Colour Changing Control System

This system provides an easy to use and highly flexible means of controlling RGB colour changing LED products. It allows the synchronised control of multiple lengths of LED strip. This is ideal for creating a modern lighting effect in a variety of domestic and commercial applications.

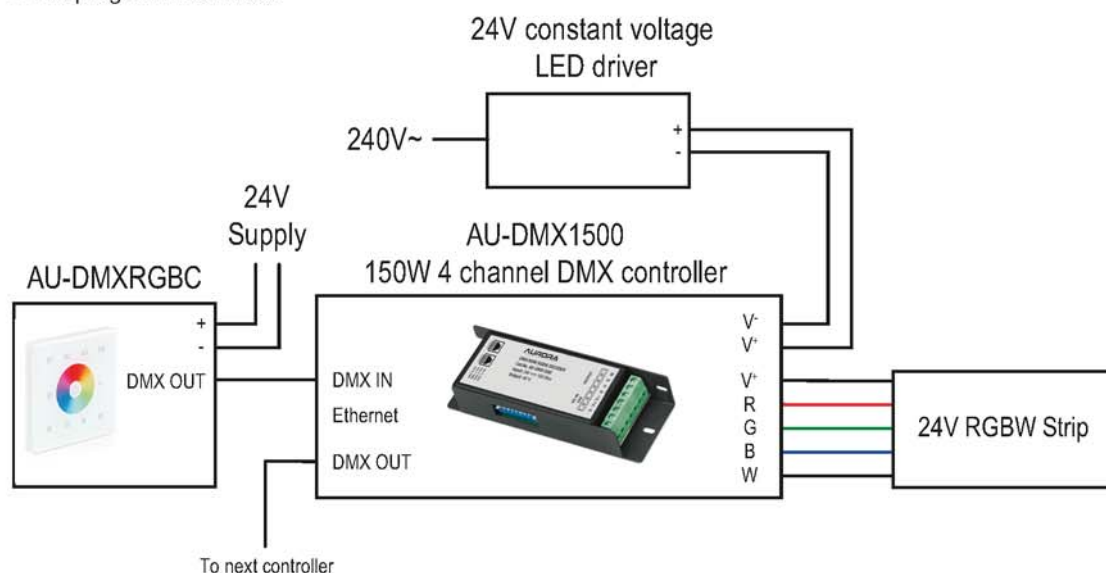

- One control system for all 12V and 24V RGB strip and flex
- Provides static colour, colour changing and sound to light (via integrated microphone)
- Single static colour can be manually mixed and dimmed (almost any colour can be achieved)
- Colour changing time delay (5 seconds to 60 minutes over eight preset time gaps) and fade speed (colour fade or colour jump) can be altered to suit the application
- "Sound to light" uses sound to switch between colours, for example changing colour to the beat of a song
- Use up to 30 colour change DMX interfaces from one DMX control switch and power supply

## DMX RGBW Colour Changing Control System

A simple and effective system for full control of RGBW strip. The wall controller and DMX sub controller allows full RGBW colour mixing, static colours, dimming and preset scenes on multiple lengths of RGBW strip.

- 4 preset scenes
- Full dimming
- Static Colour Selection
- Variable Colour Wheel
- Pre-programmed effects

# 10-105W dimmable transformers

## Features & Benefits

- 1kV surge protection – EN 61547
- Short circuit, thermal and overload protection
- Fully dimmable with resistive & inductive dimmers
- Pre-wired with 20cm primary lead
- 20cm heat resistant secondary lead
- Safety compliance – EN 61347
- EMC compliance – EN 55015, EN 61000, EN 61547
- **3 year warranty**

### EN-SC60

ETran™ 20-60W/VA **Dimmable** Low Voltage Electronic Transformer

## Features & Benefits

- Fully dimmable with resistive & inductive dimmers
- Short circuit and overload protection
- 1.0kV SURGE PROTECTION – EN 61547
- Pre-wired with 30cm primary lead
- 30cm heat resistant secondary leads
- Safety compliance – EN 61347
- EMC compliance – EN 55015, EN 61000, EN 61547
- NOTE: Maximum cable length from transformer to the furthest lamp is 2m
- **5 year warranty**

### AU-E60

10-60W/VA **Dimmable** Low Voltage Electronic Transformer

## Features & Benefits

- Fully dimmable with resistive & inductive dimmers
- Auto-reset thermal protection
- Short circuit and overload protection
- 1.0kV SURGE PROTECTION – EN 61547
- 'Loop-in, Loop-out' primary wiring terminals
- Integrated earth terminal for earth continuity
- No junction box required
- Secondary wiring terminals - 3 outputs
- Maximum load on one output - 105VA
- Safety compliance – EN 61347
- EMC compliance – EN 55015, EN 61000, EN 61547
- **5 year warranty**

### AU-E105

35-105W/VA **Dimmable** Low Voltage Electronic Transformer

| Cat. No. | Input        | Output Voltage (V) | Nominal Power | Line Current (Amp) | Max. Amb Temp (°C) | Max. Case Temp (°C) | Dimensions      |
|----------|--------------|--------------------|---------------|--------------------|--------------------|---------------------|-----------------|
| EN-SC60  | 240V 50-60Hz | 11.4V              | 60W           | 0.26               | 50                 | 75                  | 88 x 40 x 20mm  |
| AU-E60   | 250V 30-50Hz | 11.4V              | 60W           | 0.27               | 50                 | 70                  | 90 x 39 x 27mm  |
| AU-E105  | 250V 30-50Hz | 11.4V              | 105W          | 0.43               | 45                 | 75                  | 145 x 38 x 25mm |

## Technical Information

**Features & Benefits**

- Suitable for control of dimmable compact fluorescent and LED lamps, dimmable electronic transformers, LED drivers, toroidal transformers and tungsten lamps
- Integrated trimming potentiometer allows CFL and LED lamps to be set at a minimum level to prevent them going out or flickering at the bottom of the dimmer range
- Leading edge phase control
- For use with resistive and inductive loads
- Integrated over-temperature protection fuse
- Module case ultrasonically sealed to reduce dimmer buzzing
- Smooth dimming operation from 0-100% light output
- May be fitted to most dimmer plates
- One or two way switching
- Derate Dimmer by 70% for LED loads
- **1 year warranty**

**AU-DSP400X**

1 Gang 2 Way 60-400W Zero  
Cross Rotary Dimmer Module

| Cat. No.   | Description                                   |
|------------|---|
| AU-DSP400X | 60-400W 1 Gang 2 Way Zero Cross Rotary Dimmer |

**Features & Benefits**

- 1-10V Dimmer suitable for control of dimmable 1-10V LED drivers [AU-LEDD9012 / AU-LEDD9024]
- Integrated over-temperature protection fuse
- Module case ultrasonically sealed to reduce dimmer buzzing
- Fits a plaster depth (16mm) mounting box
- One or two way switching
- **1 year warranty**

**AU-DSPLED**

Rotary LED Dimmer Switch  
1-10V 1 Gang 2 Way

| Cat. No.  | Description                |
|-----------|----------------------------|
| AU-DSPLED | 1 Gang 2 Way Rotary Dimmer |

**Technical Information****Features & Benefits**

- Patented - GB2540671B
- Registered Community Design - DM/086700
- Versatile lock and release FastRfix electrical connector
- Fully enclosed to comply with I.E.E wiring regulations
- Screwless cover and cable clamps allow faster and easy installation
- 3 Pole with loop terminal - 16A
- 4 Pole version for emergency lighting installations - AU-FF04
- Large terminals for easy wiring
- Compatible with previous Fastfix AU-FF03
- Compatible with comparable products on the market
- Tested by Nemko to BS 5733:2010 + A1: 2014 General requirements for electrical accessories
- Tested by Nemko to BS EN/IEC 61535:2009 +A1 Installation couplers intended for permanent connection in fixed installations
- **1 year warranty**

**AU-FF13**

3 Pole 16A FastRfix™  
Luminaire Connector

| Cat. No. | Description  |
|----------|--|
| AU-FF13  | 3 Pole FastRfix™ Connector                               |
| AU-FF13C | 3 Pole FastRfix™ Connector with 25cm 3-core 0.75mm cable |

**Technical Information**

- 1-10V Dimmer suitable for control of dimmable 1-10V LED drivers [AU-LEDD9012 / AU-LEDD9024]
- Integrated over-temperature protection fuse
- Module case ultrasonically sealed to reduce dimmer buzzing
- Fits a plaster depth (16mm) mounting box
- One or two way switching
- Complies with the latest Electrical Safety standard for dimmer switches EN 60669-2-1:2000
- EMC compliance - EN 55015
- **1 year warranty**

## LED Emergency Lighting

Unobtrusive appearance, absolute reliability and continued operation in the event of the loss of mains electricity.

Aurora Emergency products offer a Maintained and Non-Maintained solution crossing many applications in commercial and communal environments.

Lighting levels are an effective way of assisting people to escape from a building by providing reduced level illumination.

The different types of emergency lighting are – Emergency Escape Lighting (Escape Route Lighting / Open Area Anti-Panic Lighting / High Risk Task Area Lighting) and Standby lighting which allows normal activities to continue if the mains lighting fails.

Emergency lighting is usually battery operated and can be either self-contained (Battery/Inverter mounted inside the fitting) or through a central battery system (Large battery either running the whole building or small batteries running separate floors).

## Emergency Lighting Modes

### MAINTAINED (M)

'Maintained' units operate normally and continue to operate when the normal mains supply fails (mains lighting and emergency lighting).

### NON-MAINTAINED (NM)

'Non-maintained' - the lighting only operates when the normal mains supply fails (emergency lighting only).

## Laser Etched Acrylic

Exit sign legends feature laser etched acrylic for superior light distribution.

## Self Test Function

Regardless of Maintained or Non-maintained mode, Enlite's self-test emergency lighting units are designed to cut costs in testing and maintenance of emergency luminaires. The technology in the emergency luminaire allows the unit to be tested in accordance to the BS EN 50172:2004 / BS 5266-8:2004.

Self testing emergency lights perform two types of tests;

### Short period functional test

Runs automatically every 30 days and checks the following:

- Emergency operation for a short period
- Battery capacity
- Health of Lamp
- Any failed elements are indicated by red warning LEDs

### Full period functional test

Automatically runs annually and checks the following:

- Emergency operation for full rated duration (3 hours)
- Battery capacity
- Health of lamp
- Any failed elements are indicated by red warning LEDs

# 240V maintained & non-maintained LED emergency exit signs

## Description

Range of maintained and non-maintained 240V aluminium ceiling mounted LED emergency exit signs and emergency pack with 3 hours emergency back-up duration.

## Features & Benefits

- 25 metre viewing distance
- Laser etched acrylic for superior light distribution
- Legends need to be ordered separately
- Can be maintained or non-maintained dependant on connection of switch live (excluding EN-EMLD2)
- EN-EMLD2 includes LED driver and NiMH battery in a mesh sleeve. Compact downlight fits into a 44mm cut-out. LED module may also be mounted without downlight in a 20mm hole.
- 1 year warranty

## How to use the ready reckoner lux planner

1. Select the fitting
2. Choose the Lux Level you require
3. Select the closest room dimensions of the space
4. Use the table to determine the quantity of fittings required

### Recommended Lighting Levels Explained

200 Lux - For general occupancy

300 Lux - For moderately easy tasks

500 Lux - For moderately difficult tasks

## Design criteria all downlights and LED panel

1. All dimensions shown are in metres
2. Ceiling height assumed @ 2500mm
3. Average Surface Reflectances used - Floor 20 / Walls 50 / Ceiling 70
4. Working Plane measured at 750mm above FFL
5. Maintenance Factor assumed @ 0.80

## Notes

The lighting calculation information displayed above is an indicative guide for the areas and design criteria indicated. It is recommended that the customer carries out his own calculations to verify that the proposed quantity of luminaires meet the specified requirements. All quantities shown are calculated and rounded upwards and then determined into an amount that offers a grid pattern for installation. Enlite does not accept responsibility for lighting installations which fail to comply with specification where this criteria has been used to estimate quantity.

## Design criteria for Ariah PRO

1. All dimensions shown are in metres
2. Ceiling height assumed @ 6000mm
3. Average Surface Reflectances used - Floor 20 / Ceiling 50 / Walls 30
4. Working Plane measured at FFL
5. Maintenance Factor assumed @ 0.80

- The maximum number of lamps tested may be above the safe load limit of the dimmer. This information can be gained from the manufacturer of the dimmer.
- All tests carried out in lab test conditions.

## The Building Regulations 2013 Conservation of Fuel and Power

45lm/W

Less than 5W

### L1A / L1B Compliance – What does it mean?

Reasonable provision should be made for a dwelling to benefit from energy efficient lighting in the following instances

1. A dwelling is extended
2. A new dwelling is created via change of use
3. The lighting system is being upgraded as part of a re-wire
4. New builds

Minimum of 45 Lumens per Watt

A single switch should operate no more than 6 lamp units, with a total capacity no greater than 100 watts

### Fixed Internal Lighting

To comply with the current building regulations L1A and L1B, the lamp used must have a luminous efficacy greater than 45 lumens per circuit-watt and total output greater than 400 lamp lumens. The circuit-watt figure is measured as the power consumed in the lighting circuit by the lamp and its associated control gear and power factor correction equipment.

Light fittings with GLS tungsten filament or tungsten halogen lamps would not meet the standard.

### Reasonable Provision

Within the area of the building work in the main dwelling areas, the fixed energy efficient lighting fittings should not be less than three in every four lighting fittings. Infrequently used areas i.e. garages, cupboards and other storage areas are not included in the count.

Any lighting fitting with a supply circuit wattage less than 5 Watts is also excluded from the count.

### Fixed External Lighting

Lighting which is deemed as fixed to the external surface of a dwelling and powered by the occupier's supply. (Excludes communal areas in flats etc.)

### Reasonable Provision

Light fittings should be made to enable effective control and/or the use of efficient lamps

Light fittings have a lamp capacity that does not exceed 100W per fitting and that the light automatically switches off when

1. There is enough daylight
  2. The area being lit is unoccupied, or lighting is no longer required
- OR

The light fittings use a lamp with an efficacy of greater than 45 Lumens per circuit watt, is manually controlled by the occupants and that the light automatically switches off when there is enough daylight.

## The Building Regulations 2013 Conservation of Fuel and Power

60lm/W

### L2A / L2B Compliance – What does it mean?

These building regulations refer to new or existing, non-domestic buildings, office, industrial and storage spaces (where office also includes those areas that involve predominantly desk based tasks, such as seminar rooms, conference and classrooms including those in schools) which require 60 luminaire Lumens per circuit Watt. Other areas might be those such as hotels, bars etc. which require 60 lamp lumens per Watt.

### Fixed Internal Lighting

To comply with the current Building Regulations L2A and L2B, general interior lighting should meet either one of two energy efficiency evaluation methods

1. Efficacy – Averaging over the whole area being considered, the luminaire used must have an equivalent luminous efficacy greater than 60 luminaire Lumens per circuit Watt. Reduced levels are allowed with the use of control systems.

OR

2. Calculate the LENI (Lighting Energy Numerical Indicator), which calculates the performance of the lighting in terms of energy per square metre per year. Maximum limits are provided in the regulations. LENI is calculated based on a lighting design that meets all the user's needs including controls. Recommendations for appropriate illuminance values and other lighting requirements may be found in BS EN 12464-1:2011 'Light and lighting – Lighting at work places – Indoor work places'. Both Methods have separate allowances for display lighting.

### Lighting Controls

Lighting Controls should follow guidance in BRE Digest 498, 'Selecting lighting controls'. For general interior lighting, areas should avoid unnecessary lighting at times when either daylight levels are sufficient or the spaces are unoccupied. Display lighting should be controlled on dedicated circuits.

Note - Automatically switched lighting should be subject to a risk assessment on the grounds of safety and suitability.

### Reasonable Provision

This should include easily accessible local switching within each area or at the boundaries between those working areas and main point access routes.

### Supplementary Switching

Automatic controls in addition to any local controls could further aid energy management by either:

1. Switching lighting off when no occupants are detected; or
2. Dimming or switching off lighting when there is sufficient daylight

**PLEASE NOTE - ABOVE INFORMATION IS A SUMMARY - PLEASE REFER TO RELEVANT BUILDING REGULATIONS FOR FULL DETAILS**

## European Safety, EMC Approvals & Symbols Key

|  |   |  |   |
|--|---|--|---|
|  | Dimmable  |  | Protected against powerful jets of water: Dust tight  |

## 30, 60, 90 minute fire rating explained

Remember with Enlite's ranges of Fire Rated Downlights every product is 30/60/90 rated as standard.

Providing complete product confidence.

### Minimum Period of Resistance for Domestic Properties

Domestic properties have different requirements for periods of fire resistance depending on the height of the top floor above ground level or the depth of a basement. See the following table for guidance.

| Purpose group of buildings    | Fire Resistance Minimum Periods (Minutes) |            |                                      |            |            |       |
|-------------------------------|---|------------|--------------------------------------|------------|------------|-------|
|                               | Basement                                  |            | Ground Level or Above                |            |            |       |
|                               | Depth (m) of Lowest Basement              |            | Height (m) of Top Floor above ground |            |            |       |
|                               | > 10m                                     | < or = 10m | < or = 5m                            | < or = 18m | < or = 30m | > 30m |
| <b>A. Residential (Flats)</b> |   |            |                                      |            |            |       |
| - Not Sprinklered             | 90  | 60         | 30                                   | 60         | 90         | -     |
| - Sprinklered                 | 90  | 60         | 30                                   | 60         | 90         | 120   |
